DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Matsuoka et al.

With regard to claim 1, Matsuoka et al disclose a combined terminal fitting assembly comprising:

a first terminal fitting (10) with a wire connecting podion (24);

a second terminal fitting (30) with a wire connecting portion (12);

the first and second terminal fittings being assembled such that the main bodies (11, 31) are substantially one over the other and the wires (W) are substantially parallel at lateral sides, and

engaging means(17, 34) at opposed surfaces of the main bodies (11, 31) for engaging each other by sliding the first terminal fitting substantially along a transverse direction with respect to the second terminal fitting and for holding the second and first terminal fittings assembled.

With regard to claim 2, Matsuoka et al disclose that each engaging means includes a slit (18) extending along the transverse direction from an edge of the engaging means.

With regard to claim 3, Matsuoka et al disclose that upon assembling the second and first terminal fittings one engaging means fit into the slit (18) of the mating engaging means (Fig. 2) to ensure a sufficient area of engagement between the engaging means (17, 34)

With regard to claim 3, Matsuoka et al disclose that the engaging means (17, 34) of each of the second and first terminal fittings projects from a surface of the main body .

Allowable Subject Matter

Claims 8-13 are allowed.

Art Unit: 2833

Claims 5-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

No prior art has been found to anticipate or render obvious the presently claimed subject matter. Specifically, none of the prior art of record discloses the combination of the limitations presented including the third terminal fitting structurally arranged to communicate with the first or the second terminal fitting (claims 5, 8);

The structure of the terminal fitting formed by folding the conductive sheet into at least two plates with respective engaging means (claim 7) .
